

HELP FOR TIME SINCE

PURPOSE: The Time Since is used to calculate the time elapsed since a date in the past.

When to Use the Time Since

Use this screen when you want to know the elapsed time since some time in the past.

Why would you want to do that?

Maybe you want to figure out someone's age since their birthday. Or how long since the Cubs won the World Series – not so long anymore.

How to Use the Time Since

Use the Date Pickers to select a time – Spin the Timers to select a time in the past.

Review the results – The first line shows the elapsed time since the selected time. You will see this time changing once per second.

The results below the first line show the totals in various units of time. For example, the Seconds value will show the Total Seconds since the selected time.

If the time is 2 minutes you will see 2 minutes and zero seconds in the first line and below the first line you will see 2 Minutes and 120 Seconds.

Does the selected Time have to be in the past?

No, if the time is in the future you will get an answer but you will see a bunch of negative signs.
