

HELP FOR TIME UNTIL

PURPOSE: The Time Until is used to calculate the time until a date in the future.

When to Use the Time Until

Use this screen when you want to know the time until some time in the future.

Why would you want to do that?

Maybe you want to figure out the time remaining until your birthday. Or how long before the end of the year.

How to Use the Time Until

Use the Date Pickers to select a time – Spin the Timers to select a time in the future.

Review the results – The first line shows the time until the selected time. You will see this time changing once per second.

The results below the first line show the totals in various units of time. For example, the Seconds value will show the Total Seconds until the selected time.

If the time is 2 minutes you will see 2 minutes and zero seconds in the first line and below the first line you will see 2 Minutes and 120 Seconds.

Does the selected Time have to be in the future?

No, if the time is in the past you will get an answer but you will see a bunch of negative signs.
